WHY CHOOSE EZDIHAR

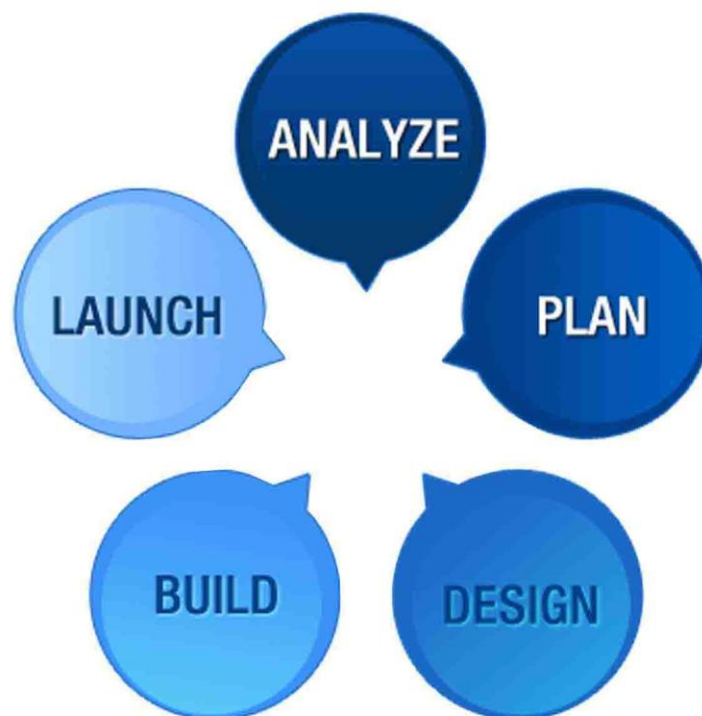

A multidisciplinary firm having a wide range of expertise and professionalism in various Disciplines

EZDIHAR Technicians are amongst the most highly qualified in their individual fields, with accreditations from many industry associations, being trained on the very latest equipment and practices.

- Strong base in the field of Design and Implementation
- Local Customer relationship
- Localisation of skilled resources

Centralisation of infrastructure / investment, thus optimising capacity.

- EZDIHAR partners with high class Vendors to deliver variety of solutions to address this dynamic and competitive environment:

IMPLEMENTATION SERVICE UNIT

- ISU is the Unit that addresses the requirements of infra structure and facility engineering. EZDIHAR has a specialist Team and Engineers, Supervisors and Technicians in different aspects of technology.
- EZDIHAR is capable of undertaking major jobs that involves multiple sites in geographically distant location simultaneously. We draw on past experience and the available logistical infra structure.

Our project management capabilities that is extremely important when it comes to major projects execution. All milestones are strictly adhered to with well-defined deliverables and acceptance criteria. Besides using high standards of workmanship, state of the art tools and methods are used.

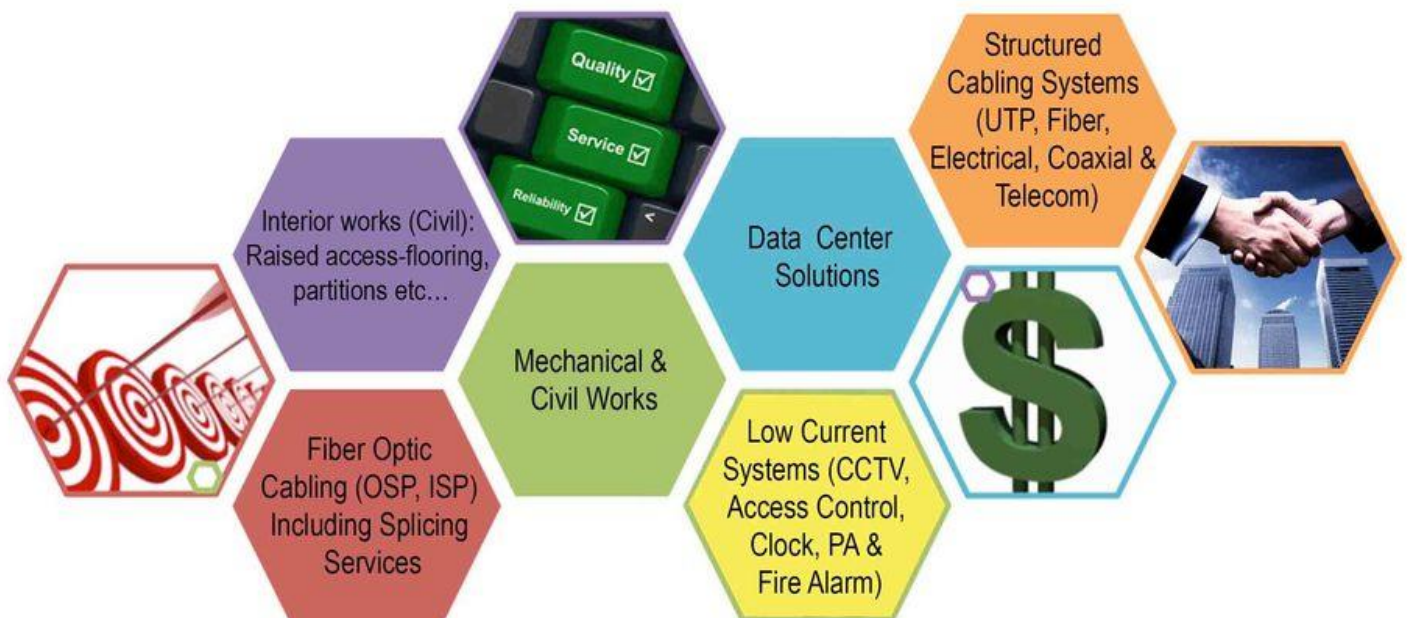

Areas of expertise:

- Fiber Optic Cabling (OSP, ISP) Including Splicing Services
- Structured Cabling Systems (UTP, Fiber, Electrical, Coaxial & Telecom)
- Data Center Solutions
- Low Current Systems (CCTV, Access Control, Clock, PA & Fire Alarm)
- Interior works (Civil): Raised access-flooring, Gypsum partitions, False ceiling etc...
- Mechanical Fabrications & Civil Works.

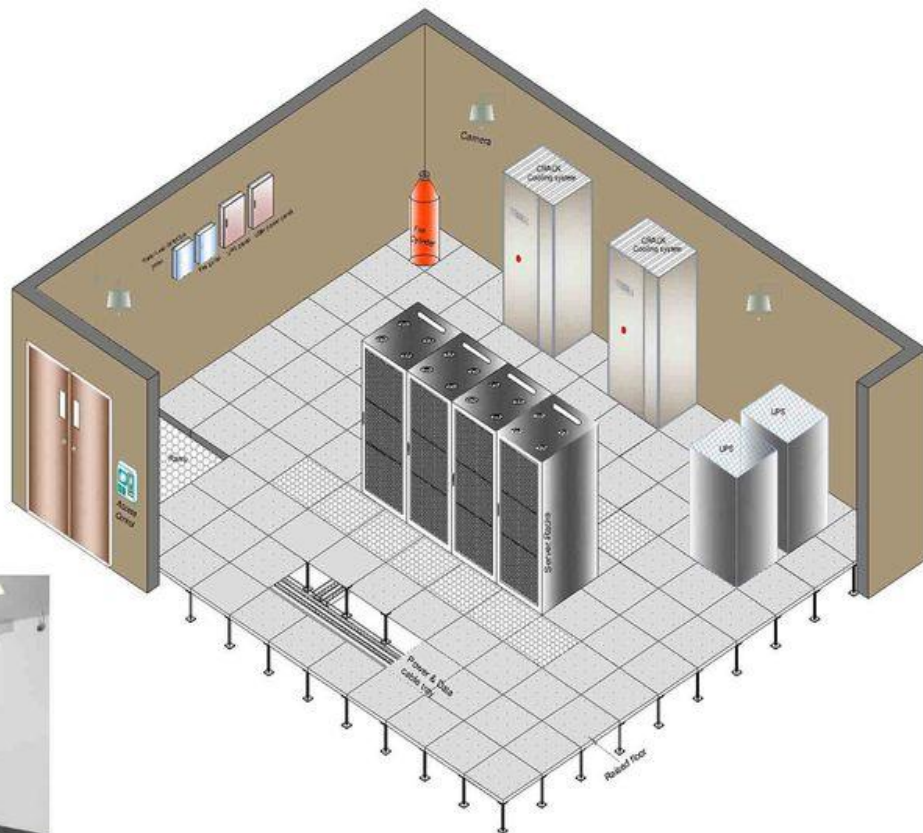

Network & Low Current Platforms:

- 3M – AMP – PANDUIT – R&M – SYSTIMAX – BELDEN – MMC – Connectix – NetBox
- AVAYA – SAMSUNG – AXIS – ACTi – PELCO – BOSCH – HIKVISION – RITTAL – HP
- DELL – ADF – atc – Awal – BOSE – YAMAHA – QSC – Simplex – NEC – Vigilance
- SONYA – Panasonic – CISCO – LINKSYS – milestone – ZKTeco – APC

Physical DC 1,2,3 Tire

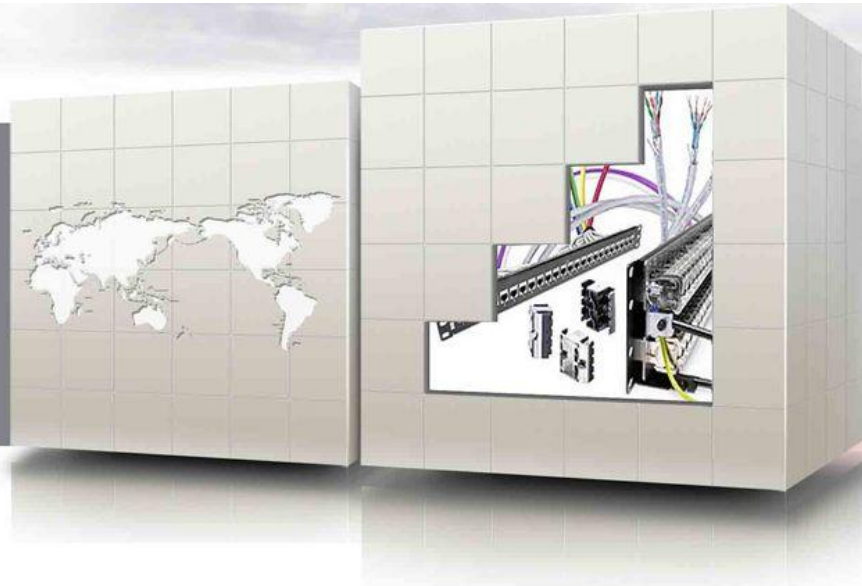

- The Data Center (DC) is the core of your enterprise information system. The growing demand to reduce operational costs, increase performance and availability, and comply with regulations has led to major shifts in DC strategies. Emerging data center technologies, including application integration, and utility computing, increase efficiency while also increasing your organization's reliance on the data center.
- We provide the design, engineering, and migration services to deliver a highly available, efficient, Scalable and manageable data-center solution to meet your specific business requirements.
- We assess your DC facilities, and formulate of design based on proven technology, analysis and an implementation roadmap. Our migration services will address data center consolidation, co-location, and high availability.
- From assessment to operational handover, we provide the project management and technical expertise to ensure that your data center is ready for the business challenges ahead.
